

Uniko Evolution

UNIKO - 1M EVOLUTION - cod. 72110000
Single-head central motor for rolling shutters

UNIKO - 2M EVOLUTION - cod. 72210000
Double-head central motor for rolling shutters

This series can be defined as a phenomenon of adaptability to all rolling shutters balanced with compensation springs thanks to a continuous improvement of the functional characteristics of the motors and their innovative design. We produce two versions of the motor Uniko: the single-head and the double-head model.

Technical characteristics

Model	Ø rolling shutter tube mm	Ø winding flange mm	Power W	Amperage A	% Services	Voltage V	Frequency Hz	Insulation Class	Capacitor in mF	R.P.M.	Torque Nm	Lifting capacity Kg
